

Wellness Visit Notification:

Dear valued patients,

As we all weather the changes in the insurance landscape, it is our intention to continue to serve each of you with excellence in comprehensive and compassionate care as your partners in wellness. Some insurance policies offer coverage for preventive wellness services without a co-pay, and require a co-pay or deductible for treatment of health conditions. It is our mission to serve the comprehensive needs of our patients at each visit. In order to best serve you, and in order to be in compliance with insurance regulations, we may be required to code the care of acute and chronic health conditions in addition to your routine, preventive care services. Some insurance plans may require copayment for these services when performed in conjunction with your annual wellness visit. We offer these services in conjunction with your annual physical as a courtesy to your time, to prevent the need for a separate visit to manage your ongoing or new health concerns.

I acknowledge understanding of this office policy.
